

# WorléeXtra Lipid Fucus

Experience the pure botanical power of the sea for a complete skin sensation with our 100% natural marine extract **WorléeXtra Lipid Fucus**. The raw material of the extract is sourced from a sustainable and eco-friendly origin in the French Brittany region, boasting exceptionally high quality. Furthermore, the extract is produced through a gentle process using only pure essential ingredients.

## Your benefits at a glance:

- ✓ High quality dried raw material of *Fucus vesiculosus*
- ✓ Transparent supply chain from the origin in Brittany, France through the extraction process made in Northern Germany to the finished product
- ✓ Reliable and sustainable natural source
- ✓ Cold extraction process
- ✓ Natural Origin Content of 100%
- ✓ Low energy input for extraction process
- ✓ No preservative

## About WorléeXtra Lipid Fucus

**WorléeXtra Lipid Fucus** is a marine extract that combines the essence of North Atlantic Ocean brown algae, *Fucus vesiculosus*, with RSP0-certified Caprylic/ Capric Triglyceride sourced from sustainable palm oil. Our product not only sets the highest standards for quality, but also for transparency and sustainability in the marine extract industry.

Our extract relies on high-quality dried *Fucus vesiculosus*, sourced from a trusted partner in Brittany, France, where the water of the North Atlantic Ocean is known for its remarkable quality. The low heavy metal content of the water compared to other origins is an essential criterion that contributes to this excellent water quality.

In Brittany, the algae is harvested with respect to the local marine ecosystem and meticulously processed. Due to a reliable partnership with the supplier, the quality control of the raw material is assured in the long term.

*Fucus vesiculosus* has obvious environmental benefits compared to land plants and are very rich in high value ingredients. It contains minerals, polysaccharides such as Fucoidan, Phlorotannins, Fucoxanthin and Phytosterols along with numerous other compounds. They are known for their beneficial properties, including antioxidative, anti-irritating, anti-inflammatory, and moisturizing effects.

**WorléeXtra Lipid Fucus** is produced through a cold extraction process, boasting minimal energy consumption to reduce the environmental footprint. We also employed eco-friendly harmless solvents. With a natural origin content of 100%, **WorléeXtra Lipid Fucus** embodies pure, unadulterated nature.

With **WorléeXtra Lipid Fucus** in your cosmetic formula, you harness the vitality of the ocean and unlock the potential of marine wellness, embracing the botanical power of nature.

## United for a sustainable development

RESPONSIBLE CARE  
OUR COMMITMENT TO SUSTAINABILITY

## The values that guide our actions

**We are committed** to forward-looking and prudent environmental protection and to preventive and comprehensive occupational health and safety as a corporate goal.

**We are convinced**, that the natural goods of water, air, and soil must be treated carefully as a part of our responsible business practices. In this way, the ecosystem in which we live can be preserved as the basis of life for future generations as well. This particularly applies to the economical and efficient use of energy and natural resources.

**We stand by** our responsibility to provide safe and secure production, storage, and transport. We ensure that our products are handled conscientiously along the entire value-added chain.
