- Suitable for the production of anti-allergic cosmetics
- Cleaner look of formulation through brighter sand color of scrub
- Natural Origin Index of 1 (ISO 16128)
- Non-GMO
- COSMOS validated
- Vegan

About WorléeScrub Olive

The new natural scrubs are made from olive stones, which are ground into powder after drying. The stones are not irradiated, but gently processed by steam sterilization.

As the product is of purely vegetable origin, it is ideally suited as a sustainable alternative to plastic granulates in the processing of vegan or anti-allergic cosmetics. We are planning to expand the WorléeScrub product range with other granulates (e.g. almond kernels) in the near future to offer you a variety of natural alternatives to plastic.

WorléeScrub Olive is available in fine (300 µm) and coarse (500 µm) form and can be used accordingly for the production of face and body cosmetics to obtain an abrasive effect. Thus, the scrub is particularly suitable in peelings and shower gels.

The natural scrubs of the olive have a very good cleansing effect on the skin and are particularly suitable for strong, stubborn dirt. Furthermore, the regeneration of the skin is supported and dead skin cells are removed.

Application Possibilities

Cleansing

United for a sustainable development

RESPONSIBLE CARE
 FOR A COMMITMENT TO SUSTAINABILITY

The values that guide our actions

We are committed to forward-looking and prudent environmental protection and to preventive and comprehensive occupational health and safety as a corporate goal.

We are convinced, that the natural goods of water, air, and soil must be treated carefully as a part of our responsible business practices. In this way, the ecosystem in which we live can be preserved as the basis of life for future generations as well. This particularly applies to the economical and efficient use of energy and natural resources.

We stand by our responsibility to provide safe and secure production, storage, and transport. We ensure that our products are handled conscientiously along the entire value-added chain.
