Gentle peeling for a smooth and clean skin

WorléeBeads

As the winter chill sets in, our skin often faces increased dryness and stress due to the harsh weather conditions. It's essential to pay extra attention to skincare, and incorporating a gentle skin peeling routine can be particularly beneficial because exfoliating helps to remove dead skin cells, promoting a smoother and brighter complexion.

With WorléeBeads, Worlée offers three sustainable exfoliants for cosmetic products with different color pigments:

- **WorléeBeads HCO based on hydrogenated castor oil**
- **WorléeBeads Jojoba based on hydrogenated jojoba oil**
- **WorléeBeads CELL based on cellulose**

These WorléeBeads are characterized by their high sphericity and narrow particle size distribution which leads to a better representation in the formula. They feature a consistently smooth surface for gentle exfoliation that is kind to the skin. They have no sharp edges that could damage the outer layer of the skin which makes WorléeBeads a better and gentler choice than other scrub types.

WorléeBeads are an ecological alternative to conventional exfoliants, since they are predominantly NaTrue and COSMOS compliant.

Benefits

- ✓ Different sizes and colors
- ✓ Made in Germany
- ✓ Originated from natural and renewable sources
- ✓ Biodegradable
- ✓ NOC of more than 97%
- ✓ Non-GMO

Formulation RR-13-58-00
