

Research and development with a fresh and brilliant shine

Working together for the products of tomorrow

From start-up to medium-sized enterprises to large corporations, we work together with every kind of company to meet the challenges of the food industry and find solutions tailored to meet individual needs. This is a natural consequence of today's continually changing nutrition trends and shifts in our eating and drinking habits that constantly escalate pressure on the industry.

To meet the challenge of rising demand for customer-specific formulations and new applications, Worlée can provide a comprehensive range of services including a variety of customer options in its food technology department consisting of a technical centre, show kitchen and tea development laboratory. Offering everything from workshops to tastings to training sessions to development of small and large samples, the members of our dedicated research and development team are ready to use their expertise and professional equipment in the technical centre, show kitchen and tea laboratory to advise and support you with your specific wishes and questions

Our range of services

Workshops

In our workshops, we work together with you to develop new formulation ideas and application possibilities or to support you in optimizing and modifying existing products. Intensive analysis of developing trends along with tastings may be included in our workshops. We are pleased to create programs to meet your individual needs.

Process technology

Whether for emulsions, sauces, soups, pastes, dry blends or pastry based – our modern state-of-the-art technical centre provides you with many solutions for your individual development projects. Our professional machinery offers the flexibility to meet customer requirements

Formulation/Application development

We work together with you to develop new custom formulations and application ideas.

Modification

We work together with you to optimize and further develop existing formulations, particularly taking into account the changing needs of consumers.

Product and thematic training sessions

Would you like to know more about our dried raw materials and processes? We are pleased to offer intensive training sessions during which we provide detailed information about origins, characteristics and application possibilities of our products as part of a tasting and we present current trends.

After Sales Service

We would be pleased to provide you with consultation and support services in the areas of storage, quality assurance and logistics.

Your advantages at a glance

When you put your trust in Worlée, you gain access to a wide variety of research and development services that provide you with real added value. Take advantage of what we have to offer:

All-in-one-Solution

Creativity

A wealth of ideas

Excellent expertise
